

# International Cooperation Office

In order to support international cooperation in the field of new energy, the International Cooperation Office is implementing the following projects.

## Asia Biomass Energy Cooperation Promotion Office

The Asia Biomass Energy Cooperation Promotion Office has been set up in order to cooperate practically and effectively with East Asian countries in the biomass energy sector.

This office functions as a contact point for institutions in East Asian countries and as the hub of a cooperation network on biomass energy involving institutions in East Asian countries and relevant institutions in Japan.

Its work includes:

- (1) Coordinating the cooperative activities of Japanese institutions based on requests from East Asian countries.
- (2) Information gathering from Japanese and East Asian country institutions and information sharing on biomass energy.
- (3) Centralizing of information on cooperation achievements, research outcomes, and human resources for research in Japanese institutions, and compiling these into a database; transmitting and providing this information domestically and internationally.
- (4) Organizing workshops and seminars in which Japanese and East Asian country institutions participate.
