

Ecological flow release

Effective Measures	Corresponding Good Practices		Reference
	Code	Page	
Regulation of agricultural water (used for power generation) intake from the river considering the conservation of river ecosystem	JP03	P62	
Prevention of low water temperature influence on fish and aquatic life by applying selective intake system to ecological flow release facility and prevention of sludge accumulation on the river bed by applying variable flush discharge scheme using ecological flow release facility	JP05	P81	
Environmental flow release	NO01	P108,P109	
	NO02	P114,P116	
	NO03	P123
